Have Your Say In Congressional Legislation Affecting Your Practice

Join our Advocates for Internal Medicine Network. Our success on Capitol Hill depends on our network of more than 15,000 physician and medical student Advocates from across the country. Advocates contact, educate, and inform their members of Congress on issues of importance to internists and their patients.

Advocates are provided with legislative updates and easy-to-use advocacy tools to communicate effectively, and develop valued relationships, with their federal elected officials and their staff.
