

Funding the Future of Disability Services

Funding the Future of Disability Services

Hello,

My name is _____

and I live in _____, zip code _____.

My organization, _____

helps people with disabilities in your district by

_____.

Our agency relies entirely on funding from the safety net, and we saw the bills in the House reforming the safety net. We are concerned about how the per-capita cap is calculated since that could lead to states reducing coverage to optional services and populations, who need them for their lives and livelihood.

These bills MUST do better for the disability community.
