Women’s Health Learning Objectives

• Recognize and discuss that women of childbearing potential with autoimmune disease represent a distinct subpopulation in need of unique care considerations

• Consider practical applications of providing optimized care for this subpopulation regardless of where they are in their journey

• Explore the important clinical considerations to examine in managing a woman throughout her reproductive journey

• Look into the future of women’s health – how to optimize care in this important subpopulation through protocols and pathways to produce optimal clinical, economic and humanistic outcomes

Our Wellness Champion Guest Speaker

Gordon Lam, MD, FACR

Medical Director, Northern Region Research Center, Carolinas Healthcare

Dr. Lam is a rheumatologist and the Director of Research with the Carolinas Healthcare System in Charlotte, NC. He completed his undergraduate degree at Princeton University and his medical degree at the Duke University School of Medicine, where he also completed his residency in Internal Medicine. He completed his fellowship at Johns Hopkins University. Dr. Lam has conducted research as a fellow at the National Institutes of Health and under the auspices of the Howard Hughes Medical Institute and the Arthritis Foundation. His work has been published in books and peer-reviewed medical journals including Arthritis and Rheumatism, Journal of Rheumatology, Journal of Clinical Investigation, Journal of Clinical Immunology, Arthritis Research and Therapy, and Current Diagnosis and Treatment Rheumatology.
